

HALF CAST IRON PLANCHA

A cast iron plate with a dual-sided design: authentic, high temperature grilling is easy and delicious on the ribbed side, whilst the smooth side is ideal for pancakes, crêpes and eggs. You still have the other half of the cooking surface available for other preparing.

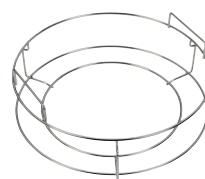

Does anyone have any further wishes?

Features convenient handles for safe and easy lifting.
High quality cast iron heats quickly and holds heat; this works perfectly with the searing capability available with an EGG.

Reverse the grid for a flat searing surface ideal for delicate and smaller ingredients. Use the ridged side for perfect sear marks and a flavor-packed crust, sautéing vegetables and even grilling sandwiches and paninis.

CARE:

Clean with soap and water before first use. Soap is not recommended after initial cleaning - hand wash with a brush and water only, dry immediately and lightly coat with cooking oil after each use. Never wash cast iron in the dishwasher.
